About Me

I am a final year B.Tech CSE (Cyber Security) student at Central University of Jammu. I am inclined towards competitive programming, logical problem solving, and Mathematical aspects of Computer Science. I am curious about security, cryptography, and data science and I am actively learning by completing short courses and workshops. You can view my code and small projects on my GitHub: github.com/prajjwal-work247.

Profile

- B.Tech CSE (Cyber Security) student at Central University of Jammu with a strong interest in Discrete Mathematics, algorithms and problem solving.
- Practical coding experience implementing algorithms and data-structure problems in C++ (binary search, merge sort, quick-sort, radix sort, selection sort) and Java (pattern generation programs). Code: github.com/prajjwal-work247.
- Certifications: NPTEL - Discrete Mathematics (IIT Kanpur); NPTEL - Foundations of Cryptography (IIIT Bangalore) 32-hour Applied Data Science & Generative AI training (IDEAS TIH, ISI Kolkata).
- Seeking internships or guided projects in software development or algorithms to build practical experience; open to learning about cybersecurity through internships and coursework.

Education

- **B.Tech Computer Science and Engineering (Cyber Security)** – Central University of Jammu (7.41 CGPA till 6th Semester) — 2022 – 26
- **Senior Secondary (12th)** – Onkareshwar Saraswati Vidya Niketan Inter College, Kanpur (87.80 % UP Board) — 2020 – 21
- **Secondary (10th)** – Bishop Westcott School, Kanpur (87.83 % ICSE Board) — 2018 – 19

Workshops & Certifications

- **2-day Workshop on Lattice-based Cryptography in Mobile Device Security**, organized by IIT Jammu. (Participation)
- **32-hour Online Training — Applied Data Science and Generative AI**, organized by IDEAS TIH, ISI Kolkata. Certificate of participation.
- **12-week NPTEL Certificate course — Discrete Mathematics for CS**, IIT Kanpur
- **12-week NPTEL Certificate course — Foundations of Cryptography**, IIIT Bangalore

Projects

GitHub Repositories / Personal Work
github.com/prajjwal-work247

- **Java Patterns** — A collection of beginner-friendly Java programs that generate classic patterns using loops and conditional logic.
- **C++ Algorithms (cpp-sorting-searching)** — Implementations of core algorithms in C++: binary search, merge sort, quick sort, radix sort, and selection sort.
- Developed these projects to strengthen my grasp of algorithmic thinking, data structures, and clean coding practices — an ongoing self-learning journey in preparation for internships and software challenges.

Technical Skills

Programming: Python, C, C++, Java (basic)
Problem Solving: Algorithm design and implementation, Project Euler challenges
Tools & Platforms: Git, Linux (Ubuntu)
Databases: SQL (basic queries)
Foundations: Networking fundamentals, Introductory cryptography

Interests

Project Euler challenges, algorithmic problem solving, programming logic, and applications of Discrete Mathematics.
